Satisfaction guaranteed

AFI's Avian Averting System is guaranteed to permanently eliminate nesting and roosting in areas where the systems are installed. Customer satisfaction is paramount; therefore, all installations are guaranteed!

AFI designs, installs and guarantees our system. Customers are not asked to write a check until the results of the system are exactly as told to the customer.

AVIAN
FLYAWAY, INC.
Bird Relocation Systems

*Avian Flyaway
sends them packing!*

Customer Testimonials for
**Invisible
Bird Relocation
Systems**

• *Custom Designed* • *Professionally Installed* • *Satisfaction Guaranteed*

We solve pest bird problems across the U.S.

"Once it is installed it takes care of itself requiring little or no maintenance. Avian Flyaway and their Electric Barrier System work as advertised. I give them an A for their product and an A for their installation services."
~ *Evergreen State College - Olympia, WA*

"An environmentally friendly and humane solution to the bird infestation. After extensive research we found the Avian Flyaway Electronic Barrier System the only system that met all of those requirements."
~ *Pima County Facilities Mgmt., Tucson, AZ*

"We at the courts have been very pleased with the Avian system and its functionality. We would recommend this humane way of protecting your properties from birds landing, roosting and defecating."
~ *Arizona Court System - Phoenix, AZ*

"All work was completed at an affordable cost, effectively and in a timely manner. The Avian Flyaway System truly got rid of our problem without harming the birds."
~ *VA Hospital - Reno, NV*

"Avian has installed their system on 12 of our buildings. Every installation has been not only 100% effective but also virtually invisible. It's difficult to find a company that stands by their promise as they did."
~ *Santa Clara CA University*

"Avian Flyaway has installed their Electric Barrier System on a number of buildings on our campus. We have absolutely no sign of pigeon droppings or feathers after several years since the system was installed. Other methods used to solve the problem had little or no effect."
~ *Colorado College - Colorado Springs, CO*

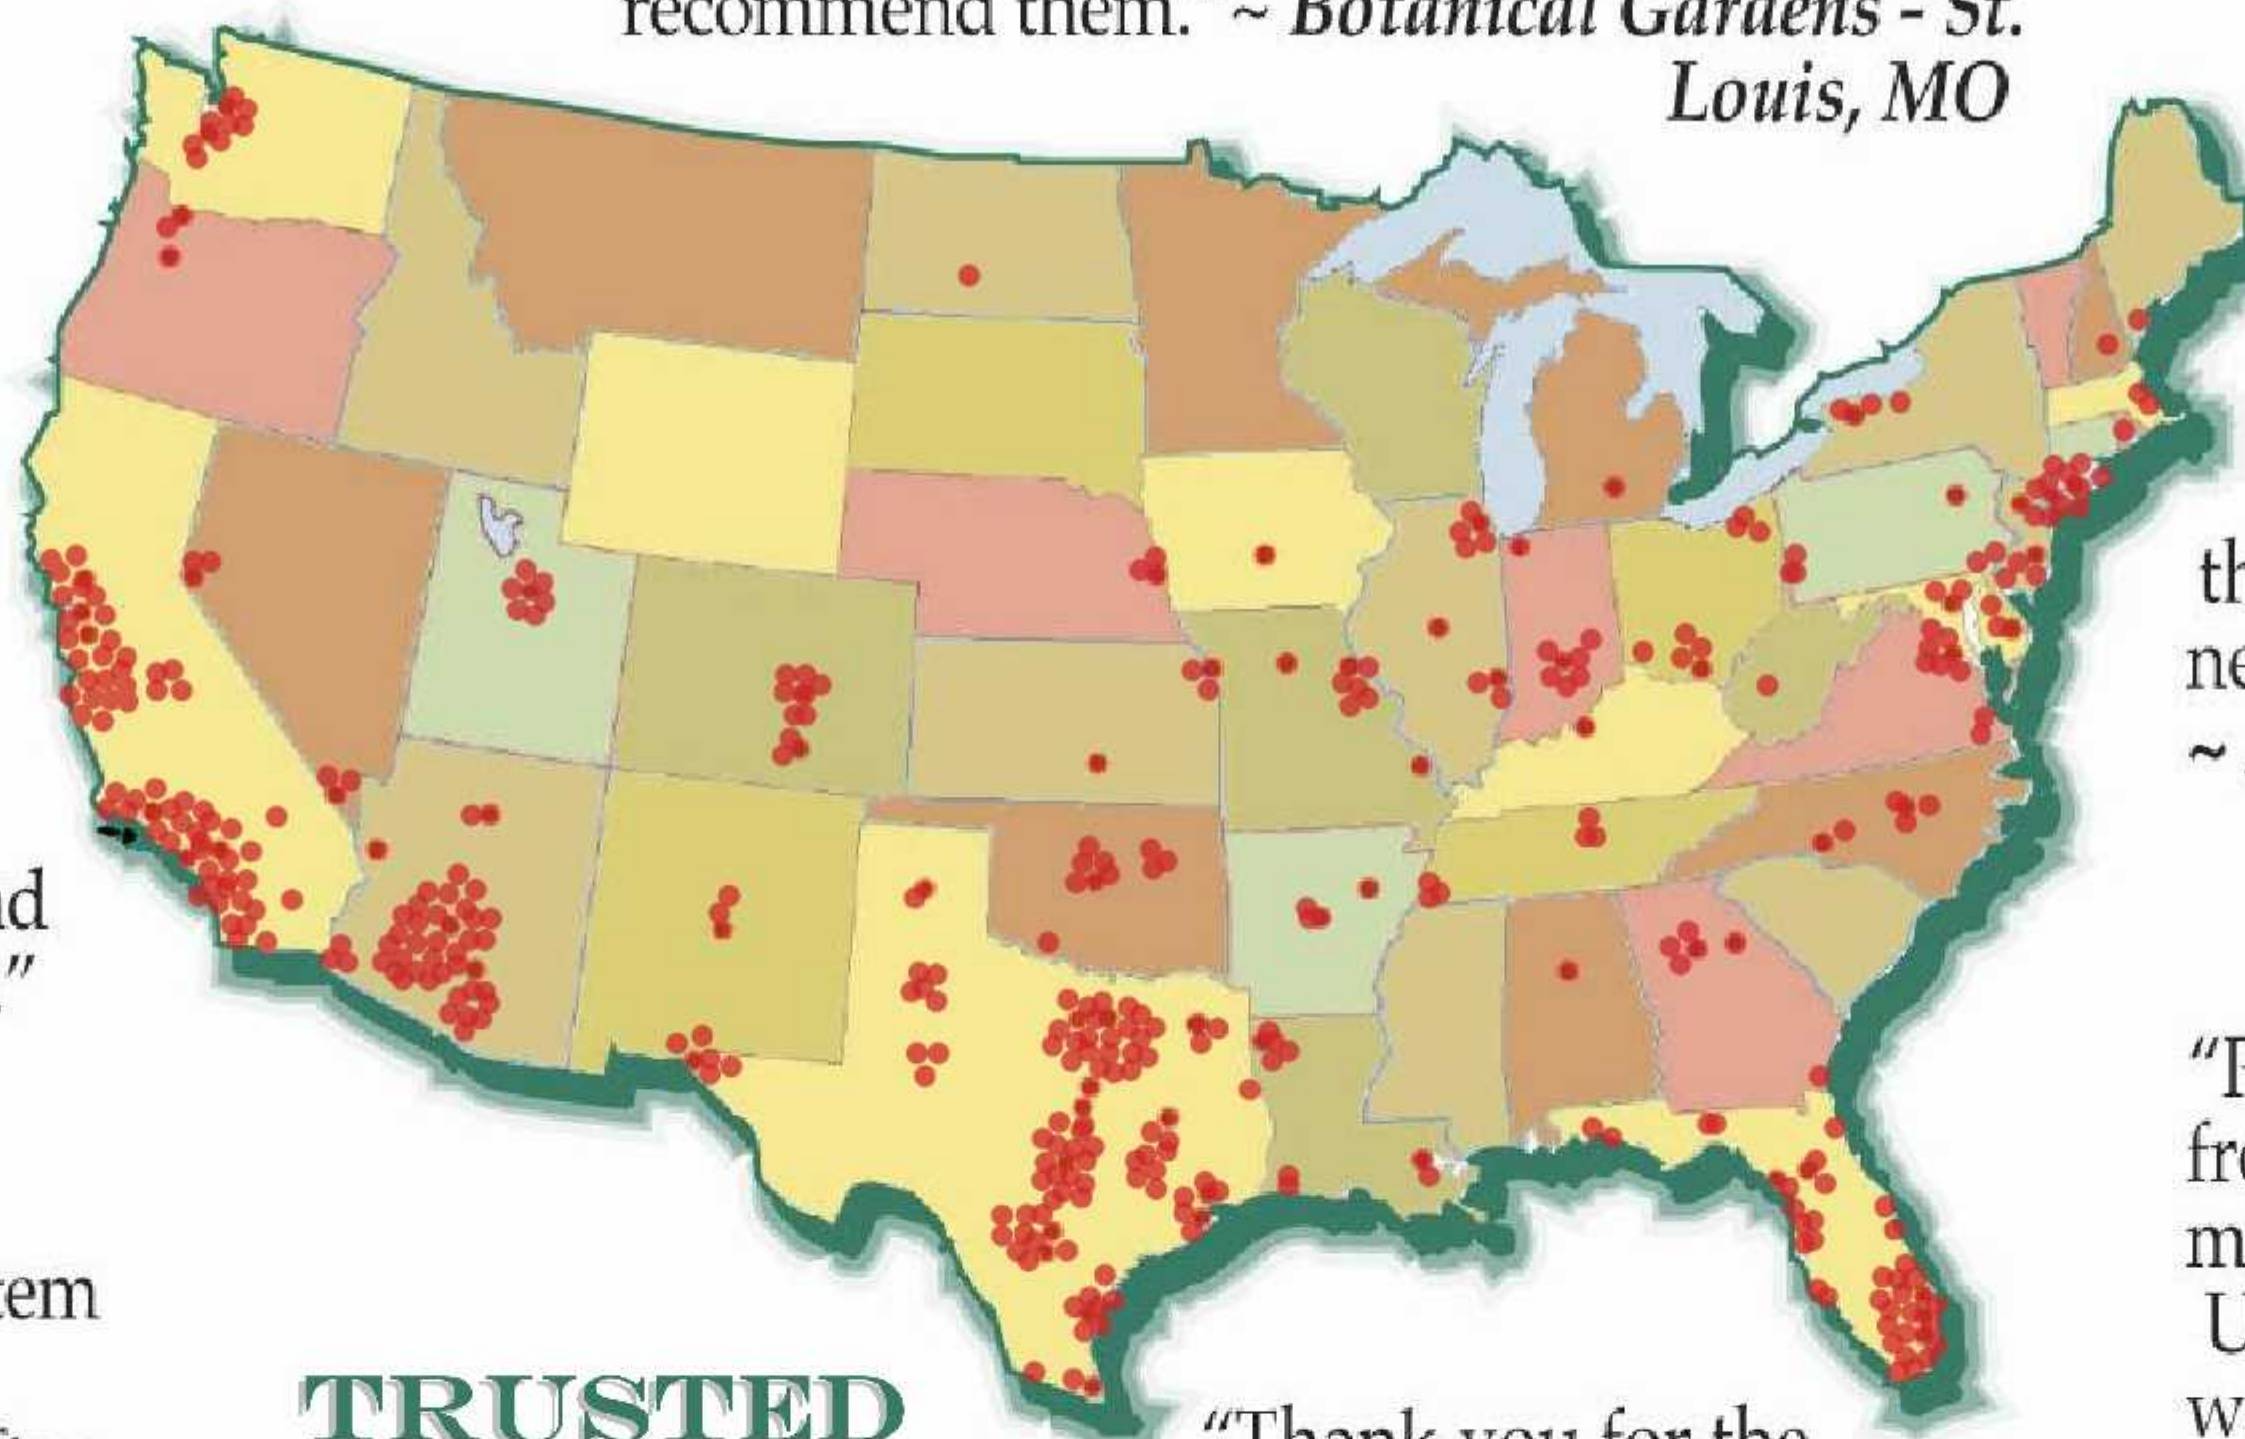

"We are extremely satisfied with the Avian Flyaway Electric Barrier System and would recommend the system without hesitation. The pigeons left immediately and have not returned after several years."
~ *Univ of California Davis - Davis, CA*

"We have had the Avian Flyaway electrical wire system pigeon deterrent system installed about a week ago and it is working great. We have since installed the same system in a smaller building. The installers were great to work with and knew what needed to be done. I highly recommend them."
~ *Botanical Gardens - St. Louis, MO*

"Thank you for the outstanding job you and your co-workers did on the installation of our Bird Relocation System. I can't begin to add up how much time and money your system has save the University."
~ *Texas A&M University - Corpus Christi, TX*

"When the Avian system was installed at Comiskey Park, we have not received a single fan complaint of any pigeon problems. This system has yielded cleaning and maintenance cost savings in addition to solving a major fan complaint."
~ *Chicago White Sox-Chicago, IL*

"How refreshing to find a company with a product that actually does what they claim."
~ *Burlington County Bridge Commission, New Jersey*

"I really didn't think what Avian proposed would work so well, but they had it dead on. We thought the birds would just move, but they just went away and stayed away. Great Job!"
~ *Time Warner - Flushing, NY*

"We have been very pleased with the system Avian Flyaway installed. We have tried many different alternatives to control pigeons in and around our Corporate Building. We will be contacting Avian in the future about other areas around our building that need addressing."
~ *Alabama Power & Light - Birmingham, AL*

"Pigeons were nesting and roosting along the entire frontage of this shopping center, creating a tremendous mess. They were a hazard to our tenants and shoppers. Upon installation of the Flyaway system, the pigeons were gone within approximately 48 hours."
~ *SLK Realty, Inc. - Boca Raton, FL*

"I do not see any potential problems with the use of Flyaway's FAW Peripheral Control System, both in terms of possible death or injury to the gulls or adverse impacts to non-target species. The Florida Audubon Society endorses the use of this system so long as periodic monitoring is performed while it is in use."
~ *Florida Audubon Society*
